

Photoshop Challenge 11/4/16

Use the images in the assignment folder to create your own creative composite. Use any and all techniques available to you. Also, you can use 1 of your own images in addition to the 4 images that I have given you.

Technical: Create your composite on an 8.5x11 canvas with a PPI of 300. Use layers to create the image, but you will need to turn in a .jpg file. Title the completed composite yourlastname.PSchallenge1. Turn this into the hand in folder at the end of class.

What you will be graded on:

| | | | | |
|---|---|--|---|---|
| Creativity: Find a way to make your image different than others with the same starting images. Send an artistic message with your final Image. | Technical Skill: Use proper Photoshop tools and techniques to create your image. Think about things like image size/resolution as well as Smart objects etc... | Organization: This refers specifically to Layers and sub-layers. Label group and use folders to keep your work in order and easy to change. | Attention to Detail: When making selections and combining images use precision and make sure transitions are smooth. | Artistic Composition: Think about good compositional elements and principles that make for an interesting image. |
